The mission of CDM is to improve the health of our patients by
being the bridge between dentistry and medicine. We seek to
understand how oral disease can affect patient total health,
and treat in such a way as to maximize overall health.

Skills:

Experienced In All Phases of General Dentistry

The use of Magnification is one of the most important aspects in
the delivery of excellent dental care.

The margin (the area where the filling or crown meets the tooth)
to be successful must be much, much smaller than the thickness
of a human hair.

Dr. Sanford is experienced in the use of
Expanded Field Surgical Telescopes 3.0x, 4.5x

He is one of the few dentists in America to use a Global G-6 Surgical Microscope with magnification up to 19x Microdentistry restorations that are as small as necessary to preserve as much natural tooth structure as possible.

Crown And Bridge, Single Units To Full Mouth Aesthetic Reconstruction
Smile Makeovers to make your smile look younger
Career oriented smile makeovers
Tooth-Colored Fillings in back teeth
Life-like Ceramic Restorations - Inlays, Veneers And Crowns
Comprehensive Treatment Planning of Complex Cases Implant Placement
